COMFIMAT CRUISE

The Cruise mattress made out of fire retardant materials, is suitable for all weights, shapes and sleeping positions. The pocket spring core is covered with a high density comfort foam to maintain stability. Our top layer of Visco foam possesses the ability to eliminate counter-pressures resulting in better blood circulation, regeneration of the body and peace of mind. The springs offer top-quality support and therefore have the ability to prevent or ease backache. On top of that, the open structure ensures a great air circulation and serves as an escape route for sweat and moisture.

The Comfimat Cruise is suitable for box spring beds, slatted beds and metal frame beds.

This mattress is also available with a waterproof cover and handles on the sides to assist housekeeping.
